EDUCATION

 Diploma in Data Science and Applications

Indian Institute of Technology,
Madras (IITM) 2022 - 25

 M. Sc. Barkatullah
University, Bhopal 2021- 19

 B. Sc.
Barkatullah University, Bhopal
2019-16

CERTIFICATIONS

- Hackerrank SQL Basic Certificate(4 star profile)
- Introduction to Core Architectural Components of Azure

ACHIEVEMENTS

Led a team of 6 developers which Qualified "Smart India Hackathon's Internal Hackathon" (organized by Govt. of India) at IITM

CO - CURRICULARS

- React Developer -**
Cosmos Tech Society- IITM
- Web Developer | Google sites -**
Wellness Society - IITM

WORK EXPERIENCE

 **Connaq** **Present - Jan '25 (15 months)**
AI/Backend Engineer, Netherlands (WFH)

• Agentic AI & Machine Learning -

- Designed a **Hybrid ML-LLM Scheduling System** combining **RAG-based retrieval** with predictions from pre-trained ML model weights, using structured JSON injection across 100+ task records to improve grounding and reduce hallucination risk.
- Orchestrated external context integration (weather, resource availability) via **Model Context Protocol (MCP) inside a LangGraph workflow**, optimizing token usage through rolling summaries, prompt compression, and hierarchical memory layers for AI powered **Chatbot**.
- Built extensible **Entity Memory** supporting dynamic addition of resources (crew, equipment, tools) at runtime, enabling adaptive scheduling without retraining ML or LLM components.

• Azure MLOps & Backend -

- Containerized AI services using **Docker** and deployed production workloads on Azure.
- Implemented **CI/CD pipelines** using GitHub Actions, reducing deployment time by ~60%, Developed REST APIs using FastAPI for chatbot interaction.

 **Wenodo Restratech, Bhopal(On-Site)** **July '24 -Jan '25 (7 months)**
Database Developer
Caters to 100+ restaurants across UK and UAE (Michelen star))

• Business Workflow Automation & ETL Operations -

Built standardized Pandas pipelines to process complex JSON/CSV datasets (5000+ rows) and integrate them into SQL databases, improving team efficiency by ~80%.

• Data Analysis and Database Development -

Managed and processed Restaurant Sales datasets for designing comprehensive and intuitive dashboards. and stored procedures for the HRMS and Cashup modules, .

 **Orange Antelopes, Bhopal(On-Site)** **Nov '23 - June '24 (8 months)**
ML Developer

- Designed a two-tower embedding-based model for product recommendations.
- Implemented semantic search pipelines using Hugging Face models.
- Reduced response latency by 60% using Annoy vector indexing.
- Computer Vision** - Implemented real-time object detection with YOLOv8 using custom augmented datasets.
- Frontend development** for ERP & E-Commerce with Angular.
- Trained developers in JavaScript and programming fundamentals.
